Invasive Species Management using Fast Feature Selection for Linear Value Function Approximation

Soheil

1 Abstract

2 Introduction

- how mdps and ecosystem management are related?
- why the issue we are working on matters from the practical perspective?
- giving some insights on how the solution evolved till this point.
- how our solution can change the game?
- contributions
- layout of the paper

3 Background

- what is an mdp?
- Bellman equation and contraction stuff

4 Fast Feature Selection

5 Introduction
